SUMMARY

Computer Science graduate with cross-functional experience across telecom and digital media platforms. Proven ability to take ownership of ambiguous problems, work across engineering, product, and vendor teams, and translate complexity into business outcomes. Brings leadership, teamwork, and communication experience from leadership programs, competitions, and student organization roles.

EXPERIENCE

Software Engineering Intern (AI/ML)

Mar. 2026 – Present

CloudlyAI

- Contributed to the core architecture of **CloudlyNet**, a telecom platform for **4G/5G network optimization** used by enterprise clients, including model integration, orchestration, and output quality controls
- Owned end-to-end delivery of a critical non-functional search capability: scoped the problem, defined acceptance criteria, rebuilt the retrieval pipeline, and validated outcomes on a benchmark set, lifting **Recall@5 from 0% to 41%** and **MRR to 47%**
- Analyzed complex **3GPP** and **O-RAN** technical specifications and structured them into a reusable knowledge base, comparable to interpreting industry regulations for business use
- Strengthened platform reliability through governance controls, response standardization, and reusable data modeling

Product Intern

Nov. 2025 – Feb. 2026

AKASH Digital TV

Dhaka, Bangladesh

- Coordinated **User Acceptance Testing (UAT)** for the AKASH GO app with cross-functional teams across product, engineering, and business; validated requirements and logged defects resolved before release
- Participated in vendor and stakeholder meetings on integration scope, blockers, and release requirements; tracked outcomes and turned business needs into inputs for IT operations and UX
- Analyzed **DTH infrastructure**, backend systems, and third-party integrations to accelerate issue triage and support product decision-making

Undergraduate Teaching Assistant

June 2024 – July 2025

BRAC University

Dhaka, Bangladesh

- Mentored **500+** undergraduate students in Algorithms, Discrete Mathematics, and Mathematics I
- Delivered **15** hours/week of consultations and lab support, resolving conceptual and debugging blockers ahead of assessments

EDUCATION

BRAC University

B.Sc. in Computer Science & Engineering; CGPA: 3.90/4.0

2022 – 2026

- Thesis: A Bilingual Study of Socio-Cultural Bias in Large Language Models through BanglaBBQ and a Post Processing Mitigation Pipeline
- Secured **5th** position out of 155 teams in Pre-Thesis II Poster Presentation

SKILLS

Product & Delivery: Requirement Analysis & Elicitation • User Acceptance Testing (UAT) & Defect Tracking • Functional Specification & Documentation • Process & Systems Analysis • Stakeholder & Vendor Engagement • SDLC • Cross-functional Collaboration

Discovery & Strategy: Product Planning Support • Agile/Scrum • Solution Benchmarking & Evaluation • AI-Assisted Workflows (Requirement Drafting, Research, Specification) • Data Analysis • Documentation

AI & LLM Engineering: LLM Orchestration & Multi-Agent Design • RAG • MCP • Prompt Engineering • Grounding with Context Files • Guardrails & Response Standardization • Governance & Traceability (LangChain, LangGraph, LlamaIndex)

Technical: Python, SQL, C • FastAPI, REST API Development • PostgreSQL, MongoDB, SQLite • Docker, Git, GitHub Actions (CI/CD), Linux

Tools & Platforms: Power BI, Tableau, Streamlit, Figma, Postman

PROJECTS & CERTIFICATIONS

AI Copilot Lite | *LangChain, LangGraph, FAISS, FastAPI, Streamlit, MongoDB, Docker*

- Two-agent AI assistant for a telco platform, combining RAG-based document Q&A with MCP-driven log debugging to resolve operational queries

Adaptive Prep System | *FastAPI, Next.js, TypeScript, Tailwind CSS, SQLite*

- MCQ study assistant that adapts question difficulty and topic focus in real time from user performance

GlowAura E-Commerce | *FastAPI, PostgreSQL, Docker, Next.js, TypeScript, Tailwind CSS*

- Full-stack skincare storefront with product search, filtering, and cart-to-checkout flows

CryptoVet | *React, Node.js, Express, MongoDB, AES/RSA*

- Pet-care service platform with strong data and payment protection, enabling users to securely manage appointments and sensitive information

IBM: Introduction to Agentic AI; Docker Essentials: A Developer Introduction

Stanford (Andrew Ng): Supervised Machine Learning: Regression and Classification

Anthropic: Claude Code 101; Introduction to Claude Cowork; Claude Code in Action

DataCamp: Intermediate Python; NLP; Machine Learning; AI Fundamentals

LEADERSHIP, VOLUNTEERING & CO-CURRICULAR ACTIVITIES

- **Shoktikonna (2025–Present)** — Selected for a women’s leadership program; appointed Founding Member of the Alumni Committee, coordinating network engagement across **300+** graduate members
- **Competitions** — Finalist, **Huawei Seeds for the Future Bangladesh 2025**; Semi-Finalist & roadshow session speaker, **Marico Over the Wall S4**; Semi-Finalist, **Sheba Solvio AI Hackathon 2025**; 40% merit scholarship, **ISCEA Supply Chain Competition 2025**; exhibited artwork at **KPR International Art Exhibition across 5 countries (2020)**
- **Assistant Secretary of Marketing and Communications | BRAC University Entrepreneur Development Forum (2023–2024)** — Led cross-functional branding and marketing initiatives, coordinating team efforts to drive student engagement and organizational outreach
- **HANS (2017–2018)** — Led inclusive community initiatives supporting autism awareness; coordinated event planning and team activities across school and community programs
- **Publication Secretary | Dhaka City College Cultural Club (2019–2020)** — Managed end-to-end publication workflows and team communications, ensuring timely delivery of promotional content and event materials
- **Vice President | YWCA Youngers Science Club (2017–2018)** — Directed team operations, delegated responsibilities across member groups, and coordinated large-scale student-led events and science workshops
